Easy-to-use software

Smart and powerful software

i-Sensor provides easy-to-use software for one-click smart installation and use, and is equipped with powerful image processing functions that can significantly and quickly improve the quality of radiographs.

High resolution imaging

25 lp/mm theoretical resolution

With the leading 16-bit ADC chip, bringing you up to 60000+ Gray scale.
High-definition sensor up to 2.2 million pixels, more details, better picture quality with a theoretical resolution of 25 lp/mm, bringing a high level of clarity and detail to your digital radiography. Clearer image effect, so that subtle root apex bifurcation can be easily found.

Thinnest sensor 4.5mm

With an ergonomically optimized Cut-Corners and 4.5mm thickness, the i-Sensor makes sensor placement easier than ever (plus, the thinner sensor specifically allows for better bitewing radiographs and simplified vertical bitewing acquisition.)

Rounded Corner

Durable and Reliable

80000+ bending test

i-Sensor is designed to prevent any kind of damages in its everyday use. Based on actual usage and tens of thousands of bending experiments, the product is durable.

Robust CNC shell fusion ultrasonic welding technology brings ultra-light weight experience and IP68 protection. The sensor can be immersed in disinfectant liquid to avoid cross infection.

IP68
